

Northwest Missourian

Friday January 21, 1983 Vol. 44 No. 15 Northwest Missouri State University Maryville, MO. 64468 10 cents

Library named after Owens

Early payment discounts, discontinuance of the \$25 pre-enrollment fee and the naming of the new campus structures were all acted upon by the Northwest Board of Regents during their January meeting.

The board unanimously approved discounts totalling \$30 for students who pay their entire fees in advance. The discounts come from tuition, room and meal contracts. A \$10 discount will be received from each area.

The board also passed a proposal calling for the discontinuance of the \$25 pre-registration fee. It is hoped that more students will pre-register now than in the past, when the fee was in effect.

The University's new library has been given the name of Owens Library. The name was one of three submitted by a committee headed by Robert Sunkel. Other names presented to the board were the John Harr Library and the Regents Library.

The Wells Learning Center will be called Wells Hall in the future.

The second floor of the Administration Building was named the Frank Deerwester Hall of Honors, after the first University president.

The hallway will contain plaques and honors of University students and faculty.

The tennis courts will be named the Frank Grube Courts, after the first Northwest tennis coach.

The board, upon recommendation of the committee, postponed the naming of the new Performing Arts Center until it is nearer completion.

The board also approved the merger of the applied science and agriculture divisions as well as the combining of the health, recreation and physical education and the

education division. Also discussed but not acted upon was the combining of the political science department with the school of business. The proposal was tabled by the board until a detailed report can be presented on the restructuring plan.

University President B.D. Owens told the board that approximately six college structured units will be developed. This will begin as early as July, when the units are recognized as colleges instead of divisions.

John Hopper, head of the faculty senate, voiced concern over the senate's role in the restructuring pro-

gram. Hopper said the senate can't make the decisions as to what department will go where. He said the senate can and will review the curriculum of the new units when they have been completed.

The board also approved the formation of a master of science degree in health and physical education. Dr. George English, vice-president of academic affairs, told the board that the program would only involve a revision of old programs and the addition of two classes. The degree is being created for students who do not wish to teach, but who do wish to major in the area.

The 1983-84 financial aid program was approved. The regents' scholarship was increased from \$200 to \$300. Also, the criteria needed to receive the scholarship was changed from a graduating grade point average in the upper 25 percent of the student's high school class to a cumulative composite ACT score of 19.

The 1983-84 graduate assistantship program received approval from the board. The program was increased \$146,800 over last year's budget.

The board approved four resignations and three retirements.

To aid in the completion of the Performing Arts Center, these workmen are adding new steam pipes to the existing ones, which will eventually be hooked up to the new building. [Missourian Photo/Larry Franzen]

Construction progressing

Health Center begins new system

Student Health Services have officially begun an appointment system for students seeking medical attention, said Jeanie Miller, secretary at the Student Health Center.

"We began having students come in by appointment on a trial basis on Nov. 30," Miller said. "If the system hadn't worked, we had planned to go back to the original way of having students just come in and wait. But the appointment system seems to have proven itself."

Miller said the major reason for requiring appointments was the long waiting period for students who randomly came into the office.

"It seems more organized with the appointments. We had a complaint box outside the office and we got a

lot of comments about students having to sit and wait for so long to see the doctor," Miller said. "Maybe 10 students would come in at 1:30 p.m. and all they could do was sign the list and end up waiting one to two hours."

By calling ahead to make an appointment, the doctor can set up an amount of time according to the student's needs. If the medical problem is a minor one, the student might be helped by one of the three nurses on staff.

"Some of the students think it's good, others think it's not so good, but you can't please everybody," Miller said. "We want to do this in the students' best interests."

The health service is open from 9

a.m. to 11:30 a.m. and 1:30 p.m. to 3:30 p.m. on weekdays.

"We can start taking appointments and the nurses can start seeing students at 8 a.m.," Miller added.

"These hours don't mean that the doctor stops seeing people at 3:30, it just means that she's finishing up with whoever she is with. She usually doesn't get out of here until around 4:30."

Miller also said that emergency patients can be seen during the noon hour.

The staff at the Student Health Care Center includes Dr. Desmond Diney, head nurse Lorraine Bauman, R.N., and assistant LPN's Sally Klaas and Deb Schuster.

Student Union patio finished

Construction on the patio in front of the Student Union was completed Christmas week, except for the planting of some trees and landscaping, said Dr. Robert Bush, vice-president of environmental affairs.

"We're really excited about it. This type of construction (remodeling) has more of a devastating effect on people than when we were building the new Performing Arts Center," Bush said.

He said that while the major construction on the building has been completed on the new library, work on miscellaneous things will continue until it is time to move in. The move is scheduled for the first week in March.

Bush added that the furnishings need to be moved into the library, and work is still progressing on the downstairs restrooms and computer center.

The library will house the mainframe computer, which is currently located in Garrett-Strong.

"The mainframe computer is looking on as a utility that serves the whole campus and is being moved out of Garrett-Strong to the library," Bush said.

He added that the present location of the computer takes up valuable class space.

Bush said the library will be available to students after spring break. He also said that the new steam lines would be put in across 4th street to the Fine Arts Building, this spring, and new steam lines to North and South Complex will be put in this summer.

Although the structure of the Performing Arts Center is completed, Bush said the whole theatrical support system of intercoms, rigging, stage curtains, sound and lighting will be installed over the next year and a half.

"There is no sense in moving in when work is still going on," Bush said.

"The state of Missouri only replaced the space lost [in the 1979 fire]. Money has been committed to the contractors to replace the missing space," he added.

For the past three to four months,

the drama department has been running a fundraising drive to help pay for the support system. Bush said that alumni donations, foundations and private sources are also contributing to help defray the costs.

Bush said \$2.2 million has been requested by the University for the 1984 fiscal year for deferred maintenance on various campus buildings.

The money, if appropriated, would pay for a new roof, electrical system, air conditioning and ventilation systems and remodeling to house the communication division in the Wells Building, Bush said.

He said other repairs needed include a new roof, heating and electrical system for Horace Mann; new seats and an elevator for the Fine Arts Building; sidewalk and lights for the Performing Arts Center; and a new roof for part of Garrett-Strong.

"That kind of funding would give us a quantum leap in our facilities. It would give us a tremendous advantage in improving our old facilities," Bush said.

Bush added that this funding request is not yet approved, but the University should know the state's decision by May.

Financial aid workshop scheduled

Two financial aids workshops for Northwest students who plan to apply for aid and scholarships for the 1983-84 academic year will be held Feb. 1 in the Student Union Ballroom and Feb. 2 in the Student Union Spanish Den. Both workshops will be held at 7 p.m.

Ellen Mothershead, director of financial aids, said the workshops will be brief informative sessions

dealing with Pell Grants and Missouri State Grants. The sessions will show students how to apply for this type of aid and will also specify requirements for receiving such aid.

David Sundberg will be a featured speaker at the workshops. He will review skills for those interested.

"We'll be stressing deadlines and procedures for filling out applications," Mothershead said. "I also

want to stress that these workshops are open to those students who don't qualify for financial aid, but who are interested in applying for a scholarship. The 1983-84 scholarships will be announced and explained at this time, also."

To receive a Guaranteed Student Loan for Spring 1983, the completed application with requested documents must be submitted to the Financial Aid office by Feb. 18, 1983.

The Finishing Touches...

Summer jobs open in conservation work

The Student Conservation Association, Inc., is accepting applications from students, ages 18 and older, who are interested in land management positions in over 200 national parks and forests across the country.

Nine hundred volunteers will be needed to fill openings for next summer and fall. The students will spend eight to 12 weeks performing tasks similar to those of professional Park and Forest Service personnel.

Interested people should write for an application to the Student Conservation Association, Inc., Box 550C, Charleston, New Hampshire, 03603. The deadline for receipt of the applications is March 15.

Applications for class due February 1

Applications for the 1983 Licensed Practical Nursing class must be turned by Feb. 1, said Leola Stanton, coordinator of the nursing program at Northwest.

Before entering the program, applicants must take an entrance examination to be given Jan. 20, 21 and Feb. 17 and 18.

Health Center open

This semester the Student Health Service in Colbert Hall is open from 8 a.m. to noon and 1 p.m. to 4:30 p.m. Monday through Friday. The Health Center is run by Dr. Desmon Dizney.

Student Senate to send proposals to Regents

The Northwest Student Senate continued to express disapproval of the proposed changes in the meal contract at their first meeting of the semester Jan. 18.

The Senate, also, worked on three proposals, which they will submit to the Board of Regents in March.

They proposed to set up a coordination board for the Student Union, seat a student on the Board of Regents and ask that the concert fee, paid by students, be sent to the Student Senate's account.

IRC sponsors speaker

The Inter-Resident Council is sponsoring Paul Curro, who will advise students on how to get a summer job next Tuesday at 7 p.m. in room 228 Golden Hall.

This semester IRC will continue to sponsor the Residence Hall Honorary Association, which is open to any dorm resident, said IRC President Todd Behrends.

IRC will also sponsor an "Almost Anything Goes" contest in early April.

Two employees retire

Two retiring Northwest employees were honored at a brief ceremony over break.

Harold Howell, a 35-year employee, in the energy plant as a fireman, retired on Dec. 31, and William Kinder, plumber supervisor and Northwest employee since 1963, retired Jan. 4.

KMA to sponsor annual Brain Bowl

The sixth annual KMA radio (located in Shenandoah, Iowa) Brain Bowl will be held each Sunday at noon beginning Jan. 28 and continuing through March 13.

The Brain Bowl is an academic quiz contest for high school students, said Mary Williams, coordinator of the event.

Each participating high school team consists of three students and one alternate. The alternate will be used if one of the regular members is absent.

Sixteen schools from Iowa, Missouri and Nebraska will be competing for \$2,000 in scholarships to be awarded to the four members of the top three teams by the KMA/May Broadcasting Company.

Every year colleges in the KMA listening area match the KMA scholarships.

"This year a record number of colleges are matching funds," Williams said. "Northwest was the first university to begin matching funds with KMA."

Williams said the idea was originally brought to KMA from the University and KXCV. Dr. George Gayler, professor of history at Northwest, has been a key coordinator in Missouri. He is the quiz master for the annual event. Dr. Richard Frucht, professor of history at Northwest, is serving as a judge this year, also.

All of the participating teams will receive trophies and plaques for their efforts.

Erosion gaining new farmland

By Dwayne McClellan

American topsoil, a vital cog in our nation's production capabilities, is eroding at an exceeding rate in the four state area (Iowa, Kansas, Missouri, Nebraska). The struggle to conserve and protect is more important now than ever before.

This message was given to more than 1500 delegates who attended a Soil and Water Conservation conference on the campus of Northwest Missouri State University Jan. 12.

Over 280 million tons of topsoil is eroding from farmlands each year. Over half of the farmland is eroding above tolerable levels. One-fourth of the cropland is losing an inch or more of topsoil in 10 years or less.

The day-long conference was opened as speakers told the Lamkin Gym crowd that a reasonable goal would be to put 75 percent of the needed conservation on the land over a 20 year period. In looking at the resources available in the area to focus on this problem, 45 percent of the needed technical help and 17 percent of the cost share money needed to accomplish the goals are available.

But one thing steps in the way of projected plans of many, and that is money.

"The costs are high," said Merle Doughty, president of the Missouri Association of Soil and Water Conservation Districts. "It will cost over \$2 billion in the next 20 years in federal, state, local and farm owners' money to meet our goals. When you realize this area produces more than \$5 billion over 20 years, to protect that resource is more than reasonable."

Doughty said agencies are seeking other cost sharing funds to get more technical assistance.

"It's obvious we can't get the conservation on the land without the funds. It will take more than a fair share of money. If we don't get it, we won't get the problem addressed. We propose that the special areas be funded in the 1981 Farm Bill. The legislation is there, but the administration hasn't funded it."

"There isn't anything more important to our well-being as a nation than our productive capabilities. And it's going fast," Doughty said.

Richard Duesterhaus, assistant chief of the soil conservation service for the Midwest, was the main

speaker at the conference. He filled in for Raymond Lett, executive assistant to Secretary of Agriculture John Block, when President Reagan announced the Payment In Kind Program Jan. 11.

Duesterhaus said local agencies and leaders must assume a larger role in conservation programs as national programs will not provide everything. He added that the federal government has had a positive impact by setting up programs to reduce the erosion problem.

"But erosion appears to be gaining new ground as more and more rural land is converted to producing row crops and wheat for export products," Duesterhaus said.

Even though 27 programs are looking at the erosion problem, after nearly a half century of federal conservation assistance programs a substantial number of farmers have not applied needed conservation measures to their own land, Duesterhaus said.

He said that stewardship of the land was the landowner's responsibility and pouring federal money in to wide ranging government programs is not the only answer.

Targeted aid is now distributed to 32 states and some success in reducing soil erosion has been seen.

Duesterhaus urged the participants of the seminars to retain the information and to take it and share it with their neighbors and friends back home and to continue showing the leadership found in American farming traditions.

The 1981 Farm Bill has brought together cost sharing, education and research programs and a committee is now developing regulations to send to Congress for funding consideration, Duesterhaus said.

State conservationists from each of the four states were at the conference. Other experts were Morris Westfall, Missouri Agricultural Stabilization and Conservation Service (ASCS); Gordell Brown, an official with the ASCS; and Charles Patterson, information officer for Missouri Director of Agriculture James Boillot.

The conference was the result of nearly a year of planning by sponsoring agencies and of financial support from major contributors.

STARTING FEBRUARY 14TH YODA GOES PUBLIC.

The saga continues.

Listen to public radio as LUKE SKYWALKER meets YODA, THE JEDI MASTER, and learns the secret behind THE FORCE.

You'll hear ten stunning stereo episodes, based on characters and events created by George Lucas. Mark Hamill, Billy Dee Williams, and Anthony Daniels recreate their original film roles, punctuated by John Williams' exciting musical score.

Tune in as high adventure takes to the air, exclusively on public radio.

Choir to attend convention

By Marcia Matt

The Northwest Celebration Show Choir will present a 30-minute show at the annual Missouri Music Educator's Convention. The 32 member choir returned to campus from semester break to put the finishing touches on their show.

Over 500 Missouri music teachers will attend the convention to be held at the Tan-Tar-A resort at the Lake of the Ozarks.

Northwest Celebration was selected for the convention from an audition submitted on audio and video taped auditions. They will be the only show choir to perform at the 1983 convention. Also featured will be the 1983 Missouri All-State high school music groups.

The choir will leave campus Thursday morning and perform at the convention at 10:30 a.m. Friday. Enroute to the Ozarks they will spend the night in Colecamp, Mo., where they will present a Thursday night show.

Kirby Shaw, director of the Colorado State University Show Choir, will attend the convention and will conduct a music clinic at the event, working with members of the Northwest Celebration.

Shaw arrangements of "Family" and "That's When the Music Takes Me" will be featured in the Northwest Celebration performance. "That's When the Music Takes Me" was arranged for the Northwest group and they will be premiering the selection at the convention.

Other selections to be featured include: "Celebration Medley," arranged by Don Sowers; "Arthur's Theme," Carl Strommen; "Time to Fall In Love," Jack Kunz; "Mr. Bassman," Jon Cymes; "Fantasy," arranged by Roger Emerson; and "Maybe Someday," Terri McPheeters, a Northwest Missouri State University music graduate.

Northwest Celebration, under the direction of Rick Weymuth, is selected by audition in the fall. Dur-

ing the 1982-83 auditions, over 100 students auditioned for 24 performance positions.

Ratings

What is your favorite television program? The Northwest Missourian wants to know. In a few weeks we will be publishing the 1983 Missourian Ratings to find out what are the most watched programs on the Northwest Missouri campus.

What we want you to do is to send us a letter telling us what your favorite TV show is. Include favorite: daytime program, comedy, drama, news show and your favorite rerun series. Then put it in an envelope addressed to Missourian Ratings, McCracken Hall, Northwest Missourian, and drop it in the campus mail.

In a few weeks we will print the Missourian Ratings and show the kind of programs the students of Northwest prefer.

The Northwest Celebration will be featured at the annual Missouri Music Educator's Convention. They were the only college choir to be selected to perform at the convention. The other choirs being featured are various high schools.

Religious film series starts

The Long Search, a 13 part film series on world religions, will be shown on Thursday nights in the auditorium of the Wells Library this semester. The first film, *Protestant Spirit USA*, will be shown January 20th at 7 p.m. Admission is free and open to the public.

The series is sponsored by The Baptist Student Center, Christ's Way Inn, the University Catholic Center and the United Methodist Center. The series was financed by the BBC and Time-Life Multimedia and took three years to make, being completed in 1978.

The programs chart the experiences of narrator Ronald Eyre on a pilgrimage that takes him from London on a journey of more than

150,000 miles to India, Japan, Israel, Rumania, Sri Lanka, Indonesia, Hong Kong, Taiwan, the United States, Egypt, South Africa, Spain and Italy. From the Protestant churches of Indianapolis to the Zen monasteries of Japan, from the Vatican to the tribe of the Torajas in Celebes, the films look beyond the splendid and the exotic to the meaning of religion for the individual, said Father Tom Hawkins of the Newman Center.

Eyre and his colleagues were not conducting a sociological survey, but looking for the authentic character of the religions in question. This meant that they interviewed men and women who were knowledgeable representatives of their faith, took it

seriously and tried to conform their behavior to their belief. The conversations, consequently, make it possible for followers of one religion to recognize the elements of value in another tradition.

The dates and titles of the first three films are: Jan 20-*Protestant Spirit USA*; Jan. 27-*Hinduism*; Feb. 3-*Buddhism*. A film will be shown every Thursday night except during holidays.

Father Hawkins says the series does not promote or favor a particular faith but is a search for meaning and understanding. When possible, a representative of each religion under consideration will reflect upon the film and answer written questions.

Coleman, 'Cats roll during break

By Pat Lodes

Victor Coleman was again in the spotlight for the Northwest Missouri State Bearcat basketball team as they won six of seven games over the holiday break. Coleman hit the 1,000 point barrier Jan. 15.

Coleman hit the 1,000 plateau against St. John's College of Kansas. With 10:34 remaining, Coleman hit a 24-footer for his 1001 point. Coleman ended the game with 33 points, his best ever as a Bearcat.

Even though the junior forward is scoring, coach Lionel Sinn has been more impressed with the shooting percentage displayed by Coleman.

"It's not just that he's scoring, but he's shooting at about 60 percent from the field," Sinn said. "That's extraordinary from where he shoots from," he said.

Against St. John's, the Bearcats racked up 108 points, the fourth best in school history. The 'Cats held St. John's to 62 points.

Todd Gordon chipped in 12 points, Joe Hurst added 10.

Monday night, the Bearcats hosted Grand View.

In the first half play was close, with Northwest holding to a 36-34 lead at halftime. Northwest came out and in the first four minutes of the second half outscored the Vikings 11-0, putting the game out of reach. The 'Cats upped their lead to as much as 18 twice during the second half win.

Coleman led the offensive charges for the ninth time in 10 games, scoring 20 points. Major Craig tossed in 17.

Northwest shot 65 percent from the field, but Sinn was more impressed with the defense.

"Grand View's guards were averaging 38 points per game," Sinn

said. "Rick (Owens), Major and Ron (Ward) can be proud of the job they did on them. They forced them to shoot 40 percent," Sinn said.

Christmas vacation proved to be a boost for the 'Cats as things go off on

the right foot as they defeated Missouri Western in St. Joseph, Dec. 11. Coleman scored 18 points, had 11 rebounds and seven assists in leading the Bearcats to a 73-64 win over the Griffons.

Major Craig (white uniform) goes after a missed shot in the 'Cats' game with Grandview. The 'Cats' used an 11-0 spurt in the second half to win the game 74-64 at Lamkin Jan. 17.

The 'Cats suffered their only loss of the break as Oklahoma City University was the only team to drop the 'Cats, 83-63, Dec. 20 in Oklahoma City.

The new year found the 'Cats a little better as they won three games in four days. Dana was the first victim as the 'Cats evened their record at 5-5 with that win. Coleman once again led the 'Cats as he pumped in 22 points and seven assists. Joe Hurst, making his first collegiate start, scored 13 points and pulled down 11 rebounds.

Mid-American Nazarene came to Maryville the next night and went home with a 22 point loss, 90-68. Coleman led the 'Cats with 28 points. Dave Honz played a key role, coming off the bench to score 11 points and pull down 11 rebounds.

"Mid-America Nazarene jumped on us by 11, then we had 35 minutes of good ball," Sinn said.

Two nights later, Northwest soundly defeated Iowa Wesleyan at Lamkin gym, 94-64. Coleman led the 'Cat charges for the seventh straight game, scoring 23 points. In that game, Coleman moved into fourth place on the Bearcat all-time scoring list. With 956 points, Coleman moved ahead of Mark Yager.

"We hoped to use those three games (Dana, Mid-America and Iowa Wesleyan) to show improvement in growth and confidence," Sinn said. "We have seen that this has happened," he said.

The 'Cats continued their streak right into their first conference game against Lincoln Jan. 12. The 'Cats

had a tough time in their MIAA opener but came away with a 70-68 "awesome" win.

Freshman Hurst provided the heroics as he slammed the winning

basket home with just four seconds left on the game clock.

"That was an awesome dunk play by Joe," Sinn said. "Awesome is a good word. It was an awesome play."

Hurst's slam was set up as Craig missed an eight foot jumper, but Hurst slammed the rebound to give the 'Cats their win.

Hurst led the 'Cat charges with 17 points and 11 rebounds. He missed one shot from the field and was perfect from the free throw line.

"That was a very good opening conference road victory," Sinn said.

Wednesday night the 'Cats were on the road at Kirksville. The 'Cats will

host Missouri Rolla Saturday. The Bearcats squeaked out a two point win over Lincoln while Missouri Rolla lost their game by nine, also at Lincoln.

NWMSU TOP SIX WRESTLERS

Stan Zeamer	84-12-3
Kirk Strand	76-37-3
Ron James	74-8-0
Kent Jorgenson	71-21-6
Gary Samburski	71-32-0
Dale Crozier	70-31-0

By Alan Cross

While most of us went home during semester break and enjoyed the company of family and friends, the Bearkitten basketball squad upped their seasonal record to 9-5 and some individual records were broken during their holiday campaign.

It is virtually impossible to give full accounts of each of the seven games that were played. However, here are some highlights from each game:

Northwest, 65- Missouri Western, 77

The Lady Griffons snapped a 'Kitten five-game winning streak in a game played Dec. 11. The 'Kittens were ahead 61-57 with 7:09 left in the game. Western, however, blew Northwest out of the water and outscored them 20-4 in the final seven minutes.

Senior point guard Monica Booth, with her ten assists during the game, moved into second place on the all-time school assist list.

Northwest, 75-Creighton, 81

Creighton freshman sensation Connie Yori riddled the 'Kitten defense, scoring 30 points, to push the Lady Jays past Northwest in the Dec. 18 match. It was another freshman, however, who really broke the 'Kittens' back. Amy Allard, who was averaging only 5.8 points and 1.5 rebounds per game before the contest, scored 22 points and pulled down seven rebounds.

Freshman Christy Heldenbrand scored 17 points, a personal best at Northwest, and was the team's leading scorer. Heldenbrand also added four rebounds and a blocked shot.

Northwest, 70-Stetson University, 66

This was the first of a three-game Florida trip for the 'Kittens and it was a hard fought victory against NCAA Div. I Stetson. Falling behind by four at half due to sixteen tur-

novers, the 'Kittens made their charge in the second half thanks to the hot hand of senior forward Mary Wiebke. Wiebke had 20 of her game high 30 points in the second half. Wiebke's 30 point performance put her into eighth place on the school's all-time scoring list.

Also, Monica Booth broke the 300-mark in career assists in that game.

Northwest, 86-Manatee Jr. College, 46

The 'Kittens stomped Manatee behind Diane Kloewer's 21 points and eight rebounds. Kloewer was 10-13 from the field and added two assists along with three steals and a blocked shot.

This game, however, does not count on NWMSU's over-all record and none of the individual or team statistics in the game will be figured into Northwest's over-all figures. NCAA regulations prohibit counting wins or losses against junior college teams.

Northwest, 105-Eckerd, 46

This is one case where it is safe to say that the game was not as close as the score makes it out to be. The 'Kittens jumped to a 25-2 lead and built it to a 53-19 lead by half. In that half, Northwest took eighty-eight shots from the field (making 23 for 26 per cent) and finished the game with 125 field goal attempts (making 46 for 37 per cent). They also out rebounded Eckerd 79-40.

Northwest, 82-Lincoln University, 58

The Bearkittens won their first MIAA game by breezing by the Tigerettes in a game played Jan. 13 in Jefferson City. Diane Kloewer led a balanced scoring attack with 15 points. The big story of the game was Marla Sapp. In her first starting assignment of the season, Sapp had

12 points, a team-leading eight rebounds, three assists and two steals.

Northwest, 61-Nebraska-Omaha, 81

The 20th ranked Lady Mavericks surprised the 'Kittens with a half-court zone press in the early going

and jumped to an 8-2 lead. UNO was never challenged by Northwest until 11:13 left in the game. The Bearkittens rallied to close a 22 point deficit to 10. The Mavericks outscored the Bearkittens 27-14 after that and posted a 22 point victory.

Betty Olson, perhaps playing the finest game of her three-year career at NWMSU, collected 15 points and ten rebounds in only 27 minutes of play. Olson was 5-7 from the field, 5-6 from the line and divided her rebounds evenly between the offensive and defensive boards.

One thing that the Bearkittens have a lot of, beside talent, are turnovers. The 'Kittens are averaging close to 19 turnovers a game. This is not a statistic to be proud of.

Coach Wayne Winstead, however, is not worried about the turnovers and says that the high number is due to a faster paced offense.

"We are trying to run with the ball more," Winstead said. "The easy baskets we have gotten because of the fast pace have more than compensated for the turnovers."

The Bearkittens will host Missouri-Rolla Saturday, Jan. 22, at Lamkin Gym. Game time is 6:00 p.m.

The 'Kittens have not played at home since winning the Ryland Milner Tournament here and have played 12 of their 14 games on the road.

Brain versus Brawn

By Dwayne McClellan

The image of the dumb jock, at least in NCAA Div. I schools, may have gone out the window. With the passing of new NCAA rulings, the future of the black athletes in college athletics may be clouded also.

As the sun set on the 77th annual NCAA meeting in San Diego Jan 12, the issue of academics in college athletics was muggy. Shots of racism were abundant and free flowing as well. All of these resulting from rulings from the lords of the NCAA.

The NCAA passed a rather controversial amendment that requires would-be freshmen athletes in Division I to score a 700 combined score on the SAT math and verbal sections or a composite score of 15 on the ACT test. Also an entering rookie must have a 2.0 grade point average on a 4.0 scale in a core curriculum that has three years in English, two in mathematics, two in social science and two in natural or physical sciences.

But the list doesn't stop here. An athlete can get a scholarship, but he can not compete if he has a 2.0 GPA overall but doesn't attain the grade point in the core and the test scores.

This ruling doesn't have any effect on the Div. II and III schools or the National Association of Intercollegiate Athletics. It probably won't do too much good for the hierarchy of college ball. Any team that has its' share of Marcus DuPrees, Rod Foster s or other top athletes will find a way for them to play.

With these new rulings, many black educators scream that the black athletes will be hurt. Many educators claim that blacks score lower on standardized tests. They say that these claims are based on certain socioeconomic and racial groups.

There have been a lot of schools that will pluck the athlete off the streets, promise him the sky, put him in a uniform, graduate him from college and the person can't read or write.

As Prentice Gautt, assistant Big Eight Chairmen, said, "I think the chief executive officers of many schools thought that something had to be done and the buck stops here."

If the new standards affect the blacks or whites remains to be seen. One way or another some things will be bound to go unnoticed. These rulings are not made to punish the athletes. They seem to make the athletes toughen up and project him to his full potential. Whether or not the major colleges whiten up or not does not matter. It is education of many young athletes that count in the world today. Maybe these new rules will project the "dumb jock" up to higher standards, becoming human.

Football recruits a plus

By Dwayne McClellan

When Vernon Thomsen was hired to replace Jim Redd as head football coach at Northwest Missouri State, he promised to begin working immediately. Thomsen wanted a winner now instead of having to wait three years.

Being true to his word, Thomsen and his coaching staff embarked on a heavy recruiting trip and recently announced the acquisition of six junior college transfers. These six transfers add some much needed beef to the Bearcat lineup.

The recruits will participate in spring practices along with returning NWMSU players.

Thomsen's new players are: defensive end Tony Coleman, defensive tackle Erich Martin, offensive tackle Brian Goodman, wide receiver Steve Hensley, offensive guard Larry Beashore and wide receiver Keith Nelson.

Coleman is a 6-5, 235 pound end. Coleman was an all-league end at Iowa Central College and Thomsen credits him with helping that program tremendously.

Martin is the biggest catch. At 6-5 Martin tips the scales at 330 pounds, making him the biggest Bearcat. Martin was an all-league selection for Glendale in the Arizona Community College conference. "Erich was a dominant figure in the line at Glendale," Thomsen said.

Goodman is another of Thomsen's "big boys". The 6-5, 240 pounder was a two-year choice at offensive tackle for NIACC. "Brian was probably the best offensive lineman in Iowa Jr. College football this year," Thomsen said.

Hensley, at 5-10, 165, was JC All-American Mark Thomsen's (Coach Thomsen's son) favorite target this past season. He's capable of 9.6 speed in the 100 and runs the short routes especially well. "He's a great

one as he gives us a chance to have the best receivers in Div. II," the elder Thomsen said.

Nelson, 6-4 and 222, has a tight end's size and a wide receiver's speed (9.7). He'll play a wide receiver spot for the 'Cats. Nelson played ahead of NWMSU's record setting Bryan Shaw at Arizona Western. "Keith was probably one of the premier junior college wide receivers in America. With Keith, Hensley and the other wide receivers we already have on campus, we may have the best crop of receivers in Div. II," Thomsen said.

Beashore, 6-2, 255, was a first-team all-conference lineman at Butler County CC. "Larry was a first team all-conference player and was highly sought-after by Div. I-AA schools," Thomsen said.

With the stepped-up recruitment program and the experience gained by last year's team the Bearcats in 1983 should be an exciting team to watch.

"I think that we filled some key positions," Thomsen said. "With the experience that we have coming back and the recruits I think that we will have a strong team."

Interested in PR? Yes? Then PRSSA is interested in YOU. What is PRSSA?

The Public Relations Student Society of America, a student-run nationwide organization founded by PR practitioners, acquaints students with professional people, methods, issues and ethics.

Public relations has evolved from an information go-between to a vital, managerial policy-making function. PRSSA helps students cultivate writing, decision-making and other skills to meet the demands of this dynamic field and keeps us abreast of trends.

What's in it for me?

Opportunity Internships arranged through local chapters place students in the work world, seminars and workshops sharpen skills, a nationwide case study competition among chapters tests your skills. The annual 4-day PRSA (the parent organization)/PRSSA national conference brings students and pros together from all over the United States. Chapters may create speakers bureaus, community PR agencies or provide other services

WHEN ARE MEETINGS? EVERY OTHER WEDNESDAY. The next meeting will be posted in the Student Union.

What do I have to do?

All students are up to their desk tops in classwork, but an education doesn't end when you close your books. Like the professional world, you'll get out of PRSSA what you put into it. All activities are optional. Just decide where your interests lie, then enjoy the opportunities. PRSSA represents the new breed for the 80's, people with ideas going places, and you're invited. If you would like to join PRSSA or would like more information on dues or activities, contact Mary Aguilar, President, 156 Robert, 582-5812.

Wrestlers have successful break

By Bob Adams

The "youthful" Bearcat wrestling team had a fairly productive holiday break as they took part in four dual matches, winning three and losing one.

Gary Collins' Bearcats hosted Central Missouri State and William Jewell on Dec. 14 in a dual meet. The 'Cat grapplers roared past CMSU, 30-9, and dominated the Cardinals from Jewell, 51-5.

Jeff Bradley recorded a pin against Central, and seven other teammates won decisions against Mule wrestlers for the rest of the points.

Todd Ensminger posted a pin and Dave Bourassa took a 9-4 decision to lead the 'Cats against William Jewell. Jewell aided their downfall as they forfeited seven matches.

Next came defending NAIA cham-

pion Central State in Edmond, Oklahoma Jan. 10. The 'Cats came up on the short end of the stick, losing 26-12.

Dale Crozier, Bob Glasgow, Bradley and Ensminger each won decisions to account for the 12 Bearcat points.

The 'Cats returned to the friendly confines of Lamkin Jan. 14 against Northeast Missouri. The 'Cats walked away with a 32-5 win, losing at only one weight.

Crozier recorded the only pin of the evening against a mismatched Bulldog squad.

"Against Northeast we were strong and did really well," Crozier said. "We've been jelling as a team and

against Northeast we really came together as a team," he said.

Crozier, a senior, moved onto the all-time NWMSU top wrestling winners' list over Christmas break. Crozier is currently ranked sixth with a record of 70-31. Crozier is definitely excited.

"I'm excited about it," Crozier said. "I never realized I was that close to being number one and my goal now is to be number one. This opportunity will help me improve. It's given me new goals to shoot for."

The Bearcats now sport a record of 11-6. The 'Cats are scheduled for action today at Southeast Missouri State. The Bearcats return home Jan. 25 when Missouri-Rolla and Northwestern come to town.
